

DIRECTOR'S MESSAGE

Dear Parents,

It has been observed through past trends that educational institutions are run on makeshift basis such as opening up Montessori, schools and so forth on small bungalows with limited space, ignoring the basic of educational requirement such as conducive atmosphere to learn and to increase the natural drive to seek.

As parents have no choice, they compromise by sending their child to school that run on such makeshift campuses. Such makeshift school's environment barely provides freedom to child sensitive mind that in turn hampers child learning process. Here we are not to criticize but to emphasize that we at KB Playgroup (KBPG) have created apart from a fostering and child centered programs, a precious serene external environment as precious and pure as your child which will enhances the natural ability of a child to learn and provide impetus to motivate a child to seek knowledge. We have no doubt in saying that a child will surely blossom like flowers blossoms during springtime, in such environment which provides opportunities to engage in meaningful activities.

We have tried best to demonstrate perfect harmony with education and nature, combining form and function into the most wonderful, effective learning experience for your child. The major reason for naming our KB Playgroup is it reflects our resolve to provide parents with a pollution free natural environment that is fundamental for a growing child.

This is why at KBPG we emphasize parents to judge themselves by seeing the environment, feel the difference and then make the decision.

It is rightly said that schooling is the soundest investment parents can make for their child's tomorrow.

Thank you,
Sincerely,

KHADIJA BABER,
Director

Freedom Within Limits
